

# PLAYMINDS: THINK TANK

**Bravo facilitates a cognitive hot box for visionaries, inventors, educators, entrepreneurs, life hackers, culture jammers and society builders.**

This is a chance to air your ideas and play ping pong with intellect. Through data visualisation, brain storming, discussion and demonstration, concepts are pulled apart and inspected to enable new vantage points from which to proceed.

bravochild is a poetic philosopher, master improviser, performance artist and game designer who has travelled Australia and the world bringing change through play and social experiments.

This is your chance to open your cognitive channels to a free-flow onslaught from the vivacious imagination of one of Australia's most colourful minds.

The workshops cover the following areas:

- How to turn on the cognitive tap.
- The freestyle mindset; Correlation vs. Disassociation.
- The art of conversation.
- Letting go of mental circuitry.
- Creative innovation.
- Balancing intuition and reason.
